

Kautilya Chenna

Contact Information

Near Saravanaa Bhavan
Fremont, California 94536

phone: +1 (385) 528-7547
email: chenna@outlook.com

Skills

Languages: C++, Python, MATLAB.

Tools: PCL, ROS, Gazebo, OpenCV, Tensorflow, Blender, Keras.

Robots: KUKA LBR4+, Rethink Robotics Baxter, SimLab's Allegro Hand, Quanser HD2.

Education

University of Utah, Salt Lake City, Utah

GPA: 3.40

Master of Science in Robotics

Aug 2016 – Aug 2018

BMS College of Engineering, Bangalore, India

GPA: 3.52

Bachelor of Engineering in Mechanical Engineering (Robotics)

Sept 2011 – May 2015

Relevant Coursework: Probabilistic Modeling, 3D Computer Vision, Artificial Intelligence, Motion Planning, Machine Learning, Robotics, Robot Control and System Identification.

Publications

“Planning Multi-Fingered Grasps as Probabilistic Inference in a Learned Deep Network”; Qingkai Lu, **Kautilya Chenna**, Balakumar Sundaralingam, Tucker Hermans; *International Symposium on Robotics Research (ISRR)*, 2017. [[PDF](#)] [[CODE](#)]

Experience

Learning Lab for Manipulation Autonomy (LL4MA Lab), University of Utah

Graduate Research Assistant

August 2016 – present

- Built a fast object detection and tracking pipeline, which is used by multiple teams in the Lab.
- Implemented Grasp Controllers and end-to-end Grasping Pipelines with motion planning and execution.

NMCAD Lab, Indian Institute of Science

Research Intern

January 2015 – July 2016

- Worked on the design and fabrication of a Flapping Wing Micro Aerial Vehicle (MAV).
 - Developed autonomous navigation and collision checking algorithms for the MAV.
-

Selected Projects

Extrinsic Calibration of Stereo Camera and Velodyne LiDAR

June 2018

- Developed a ROS package to automate calibration between Velodyne VLP-16 and ZED stereo camera.
- Reduced the mean point to point error by **72%** compared to manual feature based calibration.

Real-time Semantic Segmentation on Low-Power Android Devices

May 2018

- Developed a fast background subtraction for portrait video based on modified **SegNet** model.
- Model achieved a **mean IoU of 87.3% at 30 FPS** on Google Pixel 2.

Estimating Depth from a single image using FCN Network

March 2018

- Implemented a modified **FCN Net** and trained it on NYU Depth Dataset and KITTI Dataset.
- Model achieved a mean **RMSE error of 0.294** on NYU Depth and **0.312** on KITTI Dataset.

Object Detection and Segmentation in Point Cloud data using PointNet

January 2018

- Trained modified **PointNet** model on **YCB object dataset** and **BigBird dataset**.
- Model runs at **24 fps** on a NVIDIA GeForce 1060 GPU with an accuracy of 88.3%.

Grasp Collision detection using Convolutional Neural Networks

Ongoing

- Developed a CNN model to detect collisions btw robot and environment using PointClouds and JointState.
- Model classifies collisions with an **accuracy of 84.7%** and is ~30% faster than FCL.

The Search for Twitter Spam Bots

December 2017

- Implemented a machine learning algorithms from scratch to predict if a twitter user's content is spam.
- **Boosted trees** achieved an accuracy of **97%** and **ranked 1st** in **Kaggle competition**.

Video Action recognition using Deep Learning

October 2017

- Implemented a **Bi-Directional LSTM Model** on **VGG16** Net using Keras to classify actions in scenes.
- Achieved a Mean Average Precision of **15.7 mAP** compared to the State of the Art of 21.4 mAP.

Autonomous Grasp Inference and Execution using Baxter and KUKA Iwr4 Robots

January 2017

- Designed an end-to-end grasping pipeline to grasp objects on a table autonomously.
- Training data was collected in Gazebo simulation and tested in real world. [[ISRR 2017](#)]

Others: Motion Planning: TrajOpt, RRT and Variants, RealTime RRT*; Image Segmentation with GMM, Image De-noising using MRF;
